Steps to Staking Ethereum with Launchnodes on AWS

WORKFLOW

OUTSIDE LAUNCHNODES

Visit www.launchpad.ethereum.com and click on 'Get Started' to follow the process

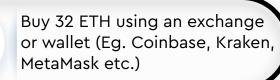

Buy Validator Node on AWS Marketplace (Prysmatic Client)

Set up ETH 2.0 Wallet for the Validator node

Move 32 ETH to an appropriate wallet (Eg. MetaMask, Authereum, Portis etc.)

Generate a Validator Key Pair using ETH Launchpad

Create IAM User

Create Cluster

Create IAM Role

Create Wallet and import Validator Keys into wallet inside AWS instance

Create and Run the Launchnodes Validator Service

Deploy Launchnodes

Container Gateway Services

START STAKING
